Argue, A. N., Photographic photometry with the Cambridge Schmidt telescope, II. Photoelectric UBV calibrations in the Coma region 97

Astrophysics :

—— The atmosphere of κ Pavonis, II, *Bell, R. A. and A. W. Rodgers* 37
—— Recombination spectra, I, *Pengelly, R. M.* 145
—— Recombination spectra, II, *Pengelly, R. M. and M. J. Seaton* 165
—— Recombination spectra, III, *Seaton, M. J.* 177
—— Excitation of coronal lines by proton impact, *Seaton, M. J.* 191
—— The ionization structure of planetary nebulae, III, *Hummer, D. G. and M. J. Seaton* 217
—— The ionization equilibrium for iron in the solar corona, *Burgess, A. and M. J. Seaton* 355
—— Absolute oscillator strengths for Cd I λ 3261 and Ag I λλ 3281 and 3383, *Bieniewski, T.* 359
—— Solar curves of growth for neutral iron, *Warner, B.* 413
—— The atmosphere of β Doradus, I, *Rodgers, A. W. and R. A. Bell* 471

Beggs, D. W. and H. von Klüber, Measurements of the general magnetic field of the Sun with a magnetograph 133
Beggs, D. W., D. E. Blackwell, D. W. Dewhirst and R. D. Wolstencroft, Further observations of the zodiacal light from a high altitude station and investigation of the interplanetary plasma, I 319
Beggs, D. W., D. E. Blackwell, D. W. Dewhirst and R. D. Wolstencroft, Further observations of the zodiacal light from a high altitude station and investigation of the interplanetary plasma, II 329
Bell, R. A. and A. W. Rodgers, The atmosphere of κ Pavonis, II. Line profiles 15
Bell, R. A., A. W. Rodgers and, The atmosphere of β Doradus, I. Differential curves of growth 471
Bennett, A. S., A survey of extended sources of radio emission 3
Bieniewski, T., Absolute oscillator strengths for Cd I λ 3261 and Ag I λλ 3281 and 3383 ... 359
Blackwell, D. E., D. W. Dewhirst, R. D. Wolstencroft, D. W. Beggs and, Further observations of the zodiacal light from a high altitude station and investigation of the interplanetary plasma, I 319
Blackwell, D. E., D. W. Dewhirst, R. D. Wolstencroft, D. W. Beggs and, Further observations of the zodiacal light from a high altitude station and investigation of the interplanetary plasma, II 329
Broten, N. W., W. J. Medd, R. Raghavarao, L. A. Higgs and, The Cygnus X complex ... 367
Brown, F. G., Classified forms and position angles of 4891 galaxies 517
Burgess, A. and M. J. Seaton, The ionization equilibrium for iron in the solar corona ... 355

Celestial Mechanics :

—— A canonical transformation for treating small coordinates, *Jeffreys, H.* 1
—— On the validity of Newton's law at a long distance, *Finzi, A.* 21
Clarke, M. E., The determination of the positions of 88 radio sources 405
Clifford, F. E. and R. J. Tayler, A note on metal-deficient red giant stars 185
Conway, R. G. and M. Moran, Observations of discrete radio sources at frequencies of 240 and 412 Mc/s 377
Davidson, W. and M. Davies, Interpretation of the counts of radio sources in terms of a 4-parameter family of evolutionary universes 241
Davies, M., W. Davidson and, Interpretation of the counts of radio sources in terms of a 4-parameter family of evolutionary universes 241

Solar System :

—— The loss of long-period comets from the solar system, *Lyttleton, R. A. and J. M. Hammersley* 257

Spectroscopy and spectrophotometry :

—— The atmosphere of κ Pavonis, II. *Bell, R. A. and A. W. Rodgers* 15
—— The spectra of helium stars, I. *Hill, P. W.* 113
—— The atmosphere of β Doradus, I. *Rodgers, A. W. and R. A. Bell* 471
—— Stellar spectral classification, I. *Deeming, T. J.* 493

Stars, Binary :

—— The eclipsing variable AL Velorum, *Wesselink, A.* 105
—— Double stars (list III) in the astrographic zones $+32°$ and $+33°$, *Goyal, A. N.* ... 215
—— Investigation of 688 doubles in the Oxford Astrographic Catalogues $+26°$ and $+25°$ with an angular separation $< 15''$ (Part II), *Goyal, A. N.* 341

Stars, Magnitude of :

—— Three-colour photometry of early-type stars near the galactic poles, *Westerlund, B. E.* 83
—— Photographic photometry with the Cambridge Schmidt telescope, II. *Argue, A. N.* ... 97

PAGE

Stars, motion of : Stellar dynamics :
—— The kinematics of gaseous nebulae and supergiant stars in the Magellanic Clouds, *Feast, M. W.* 195
—— The galactic force and stellar kinematics perpendicular to the galactic plane : O and B stars, *Stothers, R. and J. L. Tech* 287
Stars, Structure and evolution of :
—— A note on metal-deficient red giant stars, *Clifford, F. E. and R. J. Tayler* 185
Stellar Groups :
—— A catalogue of clusters in the outer parts of the Large Magellanic Cloud, *Lyngå, G. and B. E. Westerlund* 31
—— Neutral hydrogen in galactic star clusters, I. *Davies, R. D. and H. M. Tovmassian* ... 45
—— Neutral hydrogen in galactic star clusters, II. *Davies, R. D. and H. M. Tovmassian* ... 61
—— An OB association in the region of RS Puppis, *Westerlund, B. E.* 71
—— The kinematics of gaseous nebulae and supergiant stars in the Magellanic Clouds, *Feast, M. W.* 195
—— The distribution of stars in the wing of the Small Magellanic Cloud—the region NGC 602, *Westerlund, B. E.* 429
—— Planetary nebulae in the Large Magellanic Cloud, *Westerlund, B. E. and L. F. Smith* 449
Stothers, R. and J. L. Tech, The galactic force and stellar kinematics perpendicular to the galactic plane : O and B stars 287
Sun :
—— Measurements of the general magnetic field of the Sun with a magnetograph, *Beggs, D. W. and H. von Klüber* 133
—— Excitation of coronal lines by proton impact, *Seaton, M. J.* 191
—— The ionization equilibrium for iron in the solar corona, *Burgess, A. and M. J. Seaton* 355
—— Solar curves of growth for neutral iron, *Warner, B.* 413
